Dear Fellow Human beings,

### **Re: Blocking Youtube Channels**

Like almost every parent in israel I am using youtube, and I allow my young daughters to use youtube as well, under my user, so I can monitor their views.

Most of the parents I know act the same, and we all have a common complaint: famous low level youtube channels, that upload trash content, using their kids, that have negative added value. Actually, I am pretty sure that if someone is watching those videos, their IQ, EQ and \*Q decrease bit by bit just by watching.

Of course we do not accuse you of allowing those trashes to upload their content to the platform. Being an idiot in public is not a crime, especially if said idiot is making profit out of it.

Nonetheless, I do ask and demand, as a fellow human being, as a client, and as an israeli citizen, that you allow the users to block channels using our user.

I as a parent have a right to control the content my kids see and you, as a content provider, should allow me a proper way to exercise this basic human right, that is deprived from me.

I believe in progress, and I believe it is your duty to believe in progress as well when you perform your roles as CEO of technological company such as google/youtube, so I want to believe that this letter will be enough to persuade you that my request, on behalf of every parent in israel and the world, that use your services, will be fulfilled and you will implement a channel blocking option in your service, without the need of customer uprise.

Thanks so much for your consideration,

David's-Arrow Ozer
